</table>

**Percentage of families in this group by region**

- 0% - 50%

**Percentage of potentially served families in this group by region**

- 0% - 80%

---

**Key Takeaways**

- **The supply** of home visiting programs has the capacity to serve less than one quarter of families in this group in all regions except Northern.
- **The capacity** of home visiting programs across the state that serve this group could only meet about one eighth of the demand (13%). Communities can use this snapshot to examine gaps in resources for families and develop corresponding action plans.
**Bay Area**

Programs serving this group by home visiting model type:
- **20** Evidence-based per HHS guidelines
- **0** HV-compatible
- **11** HV-compatible with health focus
- **5** Models implemented in multiple communities
- **1** Model implemented in a single community

Demographics of this group*:

- American Indian & Alaskan Native: <1%
- Asian American & Pacific Islander: 4%
- Black: 2%
- Latina: 15%
- White: 15%
- Another race: <1%

**Central Coast**

Programs serving this group by home visiting model type:
- **10** Evidence-based per HHS guidelines
- **0** HV-compatible
- **2** HV-compatible with health focus
- **1** Model implemented in multiple communities
- **0** Models implemented in a single community

Demographics of this group*:

- Asian American & Pacific Islander: 2%
- Black: 5%
- Latina: 96%
- White: 12%
- Another race: <1%

**Central Valley and Sierra**

Programs serving this group by home visiting model type:
- **45** Evidence-based per HHS guidelines
- **0** HV-compatible
- **5** HV-compatible with health focus
- **6** Models implemented in multiple communities
- **0** Models implemented in a single community

Demographics of this group*:

- American Indian & Alaskan Native: 1%
- Asian American & Pacific Islander: 1%
- Black: <1%
- Latina: 8%
- White: 96%
- Another race: <1%

**Inland Empire**

Programs serving this group by home visiting model type:
- **20** Evidence-based per HHS guidelines
- **0** HV-compatible
- **1** HV-compatible with health focus
- **9** Models implemented in multiple communities
- **0** Models implemented in a single community

Demographics of this group*:

- American Indian & Alaskan Native: 1%
- Asian American & Pacific Islander: 2%
- Black: 4%
- Latina: 99%
- White: 9%
- Another race: <1%
Los Angeles

Programs serving this group by home visiting model type:
- **32** Evidence-based per HHS guidelines
- **0** HV-compatible
- **1** HV-compatible with health focus
- **16** Models implemented in multiple communities
- **1** Models implemented in a single community

*Families with a certain race/ethnicity status include those with at least one parent with this race/ethnicity identity, thus families may be double counted. Race/ethnicity suppressed for cell sizes less than 11.

Data regarding home visiting programs were based on voluntary survey responses from programs; therefore, they may not include all home visiting programs in California.

The number of families with children under age 3 accounts for child(ren) and their residential parent(s). Each household may include multiple families; in this case, those families are counted as separate families. Same-sex parents are also counted. If there is no parent in a family, the head of the household and their spouse (e.g., grandparents) were counted as the parents.

Families with a certain race/ethnicity status include those with at least one parent with this race/ethnicity identity.

*Source:* Data were from 1-year microdata (2019) from the Census Bureau.

Definitions for the five home visiting model type categories:

1. Evidence-based per HHS guidelines (e.g., Healthy Families America, Nurse-Family Partnership, Parents as Teachers)
2. Home visiting-compatible (i.e., coordinated care initiatives and interventions used alongside models)
3. Home visiting-compatible with health focus (i.e., coordinated care initiatives and interventions with a health focus used alongside models)
4. Model implemented in multiple communities (e.g., Nurturing Parenting Programs, Triple P-Home Visiting, Welcome Baby)
5. Model implemented in single community (e.g., Black Mothers United Pregnancy Mentoring Home Visiting Program, Welcome Home Baby)
