

Home Visiting Supply and Demand Regional Snapshots

Families with Children Under 3 years old with Special Health Care Needs or Selected Disabilities

Current demographics: Total families in this group by region

Current capacity: Programs with ability to serve at least some families in this group by region

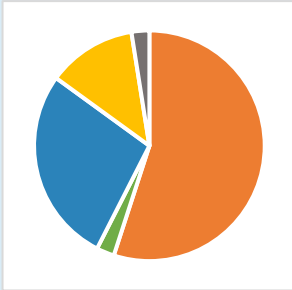

Key Takeaways

- ★ **The supply** of home visiting programs has the capacity to serve less than half of families in this group in all regions except Northern and Los Angeles County.
- ★ **The capacity** of home visiting programs that serve families in this group could meet a little over one third of the demand (36%). Communities can use this snapshot to examine gaps in resources for families and develop corresponding action plans.

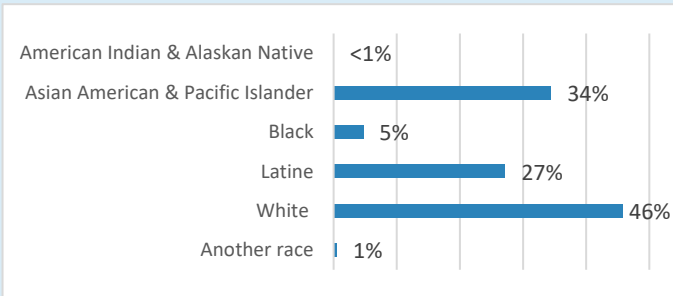

Bay Area

Programs serving this group by home visiting model type:

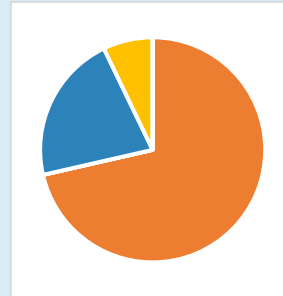

- 22** Evidence-based per HHS guidelines
- 1** HV-compatible
- 11** HV-compatible with health focus
- 5** Models implemented in multiple communities
- 1** Model implemented in a single community

Demographics of this group*:

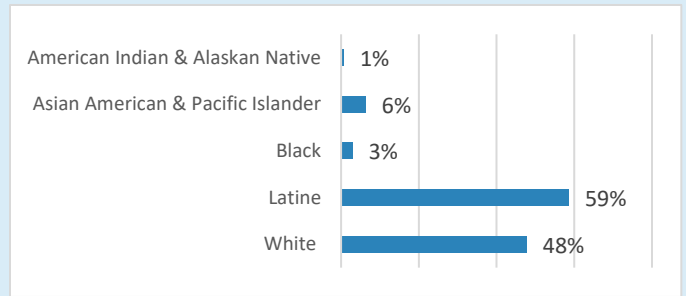

Central Coast

Programs serving this group by home visiting model type:

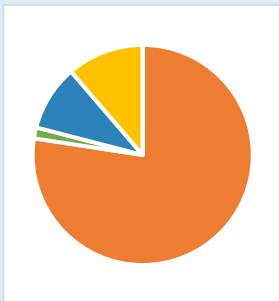

- 10** Evidence-based per HHS guidelines
- 0** HV-compatible
- 3** HV-compatible with health focus
- 1** Model implemented in multiple communities
- 0** Models implemented in a single community

Demographics of this group*:

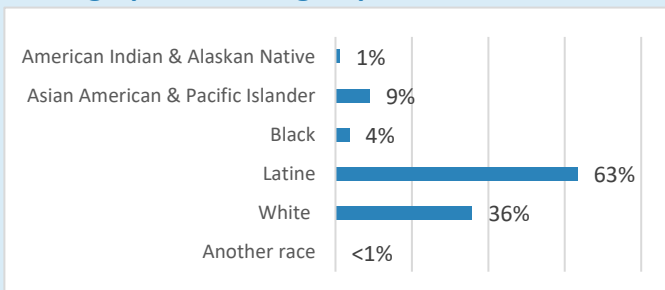

Central Valley and Sierra

Programs serving this group by home visiting model type:

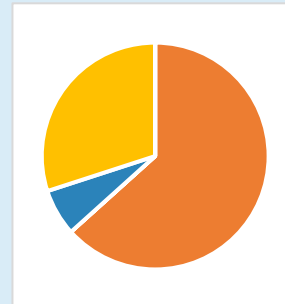

- 48** Evidence-based per HHS guidelines
- 1** HV-compatible
- 6** HV-compatible with health focus
- 7** Models implemented in multiple communities
- 0** Models implemented in a single community

Demographics of this group*:

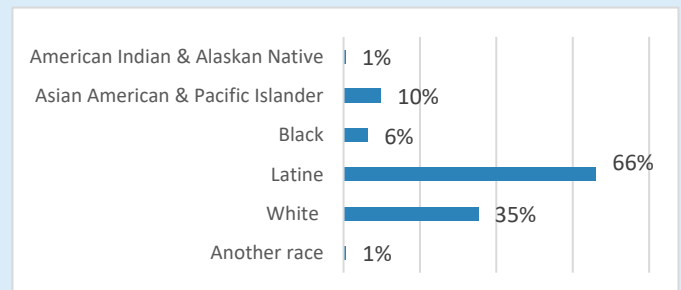

Inland Empire

Programs serving this group by home visiting model type:

- 19** Evidence-based per HHS guidelines
- 0** HV-compatible
- 2** HV-compatible with health focus
- 9** Models implemented in multiple communities
- 0** Models implemented in a single community

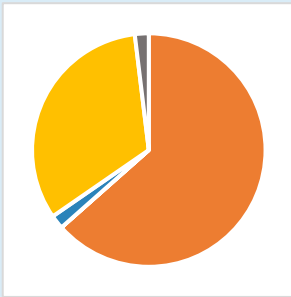

Demographics of this group*:

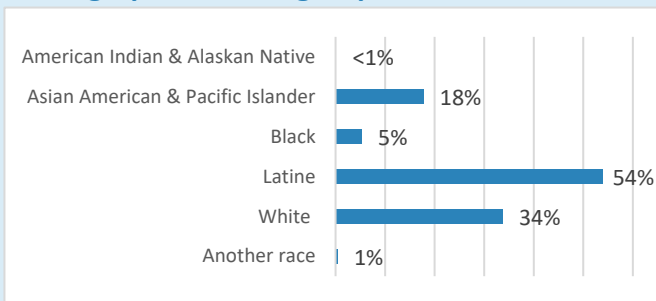

Los Angeles

Programs serving this group by home visiting model type:

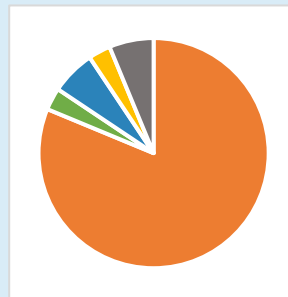

- 33** Evidence-based per HHS guidelines
- 0** HV-compatible
- 1** HV-compatible with health focus
- 17** Models implemented in multiple communities
- 1** Model implemented in a single community

Demographics of this group*:

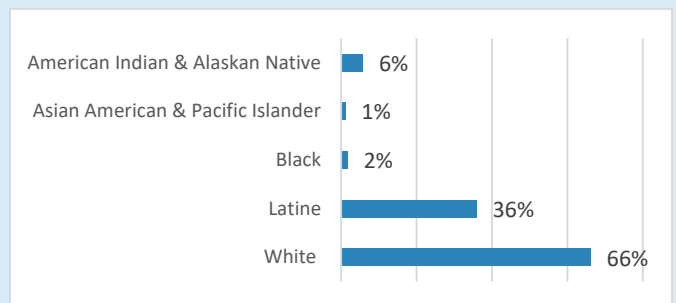

Northern

Programs serving this group by home visiting model type:

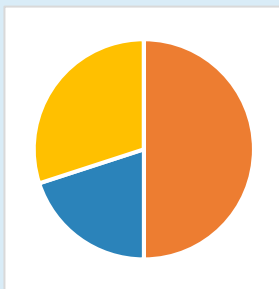

- 26** Evidence-based per HHS guidelines
- 1** HV-compatible
- 2** HV-compatible with health focus
- 1** Model implemented in multiple communities
- 2** Models implemented in a single community

Demographics of this group*:

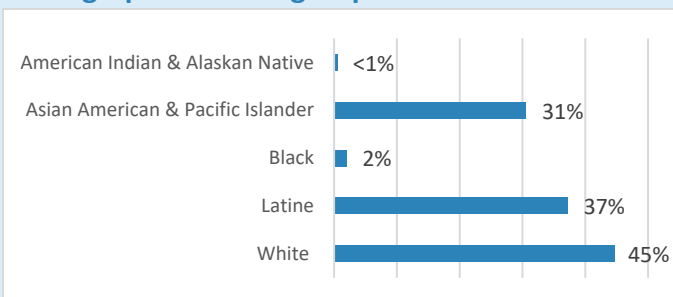

Orange County

Programs serving this group by home visiting model type:

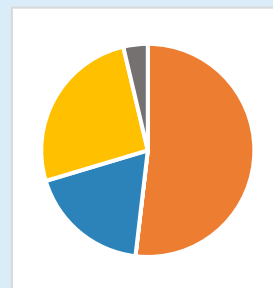

- 5** Evidence-based per HHS guidelines
- 0** HV-compatible
- 2** HV-compatible with health focus
- 3** Models implemented in multiple communities
- 0** Models implemented in a single community

Demographics of this group*:

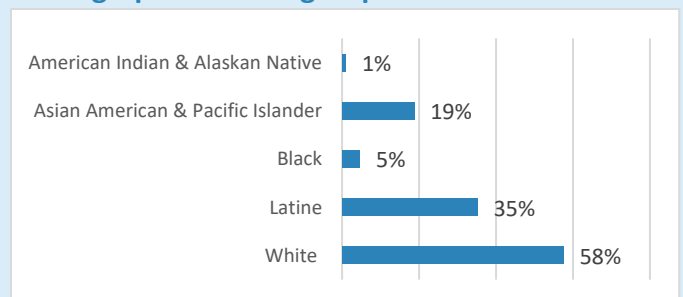

Sacramento Area

Programs serving this group by home visiting model type:

- 14** Evidence-based per HHS guidelines
- 0** HV-compatible
- 5** HV-compatible with health focus
- 7** Models implemented in multiple communities
- 1** Model implemented in a single community

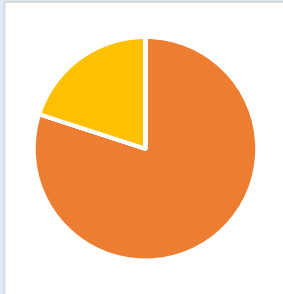

Demographics of this group*:

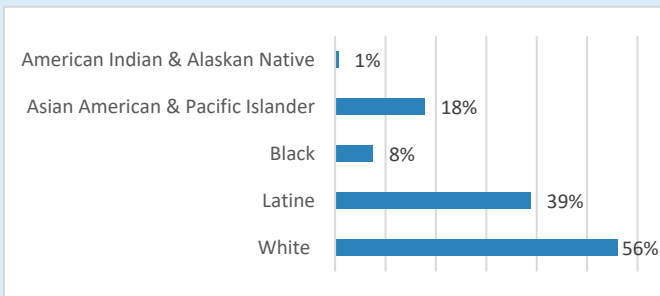

San Diego County

Programs serving this group by home visiting model type:

- 8** Evidence-based per HHS guidelines
- 0** HV-compatible
- 0** HV-compatible with health focus
- 2** Models implemented in multiple communities
- 0** Models implemented in a single community

Demographics of this group*:

Please find additional, county-level data by using the CA Home Visiting Mapping Tool:

<https://www.childtrends.org/publications/mapping-californias-home-visiting-landscape>.

*Families with a certain race/ethnicity status include those with at least one parent with this race/ethnicity identity, thus families may be double counted. Race/ethnicity is suppressed for cell sizes less than 11.

Data regarding home visiting programs were based on voluntary survey responses from programs; therefore, they may not include all home visiting programs in California. Data regarding number of children with special health care needs were provided by Data Management and Analytics Division at California Department of Health Care Services.

The number of families with children under age 3 accounts for child(ren) and their residential parent(s). Each household may include multiple families; in this case, those families are counted as separate families. Same-sex parents are also counted. If there is no parent in a family, the head of the household and their spouse (e.g., grandparents) were counted as the parents.

Source: Data were from 1-year microdata (2019) from the Census Bureau.

Definitions for the five home visiting model type categories:

1. Evidence-based per HHS guidelines (e.g., Healthy Families America, Nurse-Family Partnership, Parents as Teachers)
2. Home visiting-compatible (i.e., coordinated care initiatives and interventions used alongside models)
3. Home visiting-compatible with health focus (i.e., coordinated care initiatives and interventions with a health focus used alongside models)
4. Model implemented in multiple communities (e.g., Nurturing Parenting Programs, Triple P-Home Visiting, Welcome Baby)
5. Model implemented in single community (e.g., Black Mothers United Pregnancy Mentoring Home Visiting Program, Welcome Home Baby)
