

Child Care Stabilization Snapshot for GEORGIA

The COVID-19 pandemic created significant hardships for working families and for child care providers caring for young children. In response, historic federal investments were made to help prevent an already fragile early care and education (ECE) system from collapsing. Since March 2020, Congress has allocated over \$52 billion to states to help stabilize child care and support families with young children. Specific funding mechanisms have included:

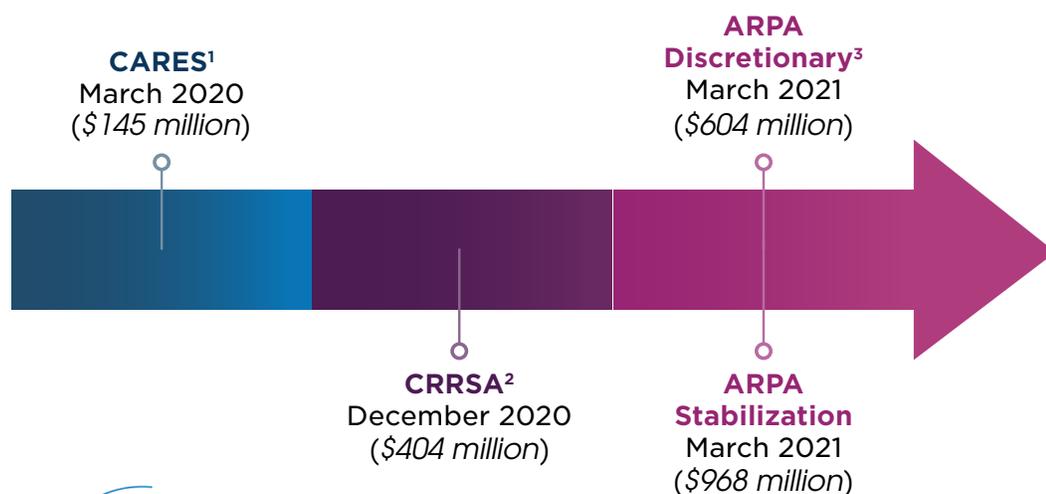

- The Coronavirus Aid, Relief, and Economic Security (CARES) Act
- The Coronavirus Response and Relief Supplemental Appropriations (CRRSA) Act
- The American Rescue Plan Act (ARPA)

Funding was intended to support a range of activities—including expanded access to child care assistance for working families and support for child care providers to avoid closure—to prevent the loss of essential child care infrastructure needed to support families returning to work and children’s learning. As states and territories approach the end of these funds, it is important to track whether families and child care systems are returning to pre-pandemic levels of child care access and supply and what additional investments state leaders may need to avoid future collapse.

This data profile for Georgia provides a snapshot of the amount of COVID-19 funding received, how it was used, and trends in parental workforce participation, income levels, work disruptions due to child care needs, child care subsidy receipt, child care supply, and wages for child care workers.

Total federal funding for Georgia: **\$2 billion**

Timeline

Child Trends conducted a national scan of how states used COVID-19 relief funds to support families and child care programs during the pandemic. The scan included policy changes to expand financial support to child care programs, serve more families, provide mental health supports, and improve the referral systems needed to connect families with services. This section highlights these uses, the number of direct grants to child care programs, and the allocation of state funding to supplement federal funding or continue child care stabilization policies.

How Georgia uses COVID Funds⁴

- Reduce/Waive family co-payments/fees
- Increase reimbursement rates
- Expand eligibility criteria
- Payment based on enrollment not attendance
- Improve information systems and/or enhanced referrals to help families identify care
- Payments continued during closures
- Provide mental health consultation services
- Financial support to workforce members

Stabilization Grants Received by Child Care Providers by Type of Care⁵

Number of providers that received a grant	
Total programs	4,155
Center-based programs	2,975
Home-based programs	1,180
Other	0
Average grant amount received	
Center-based programs	\$254,300
Home-based programs	\$25,100

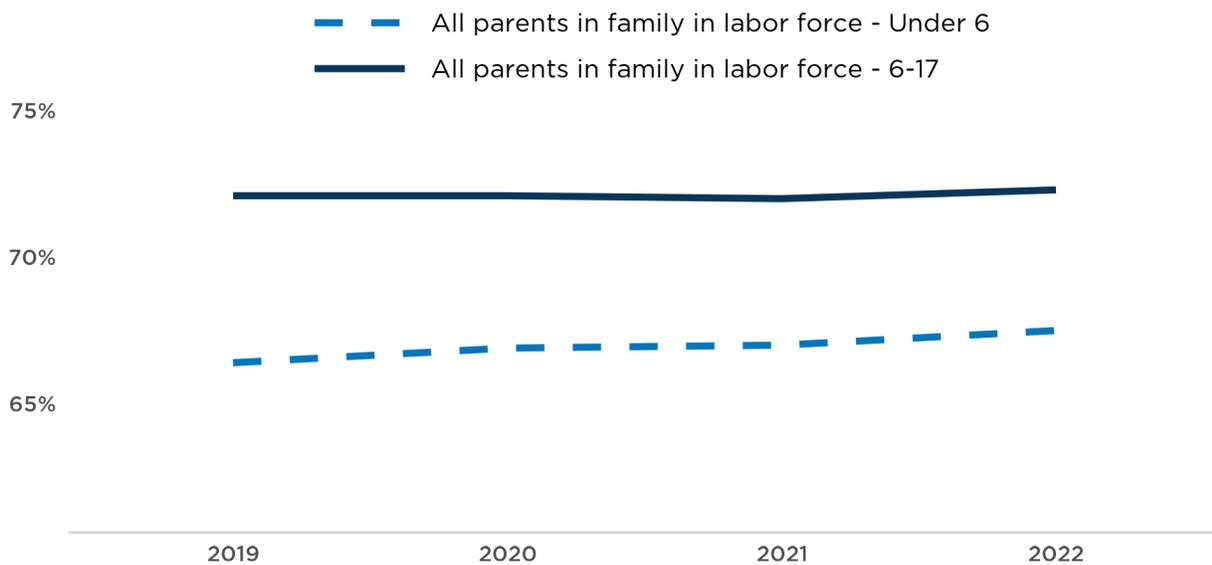

Increase Funding to Supplement or Continue Child Care Stabilization Policies⁶

- Yes No

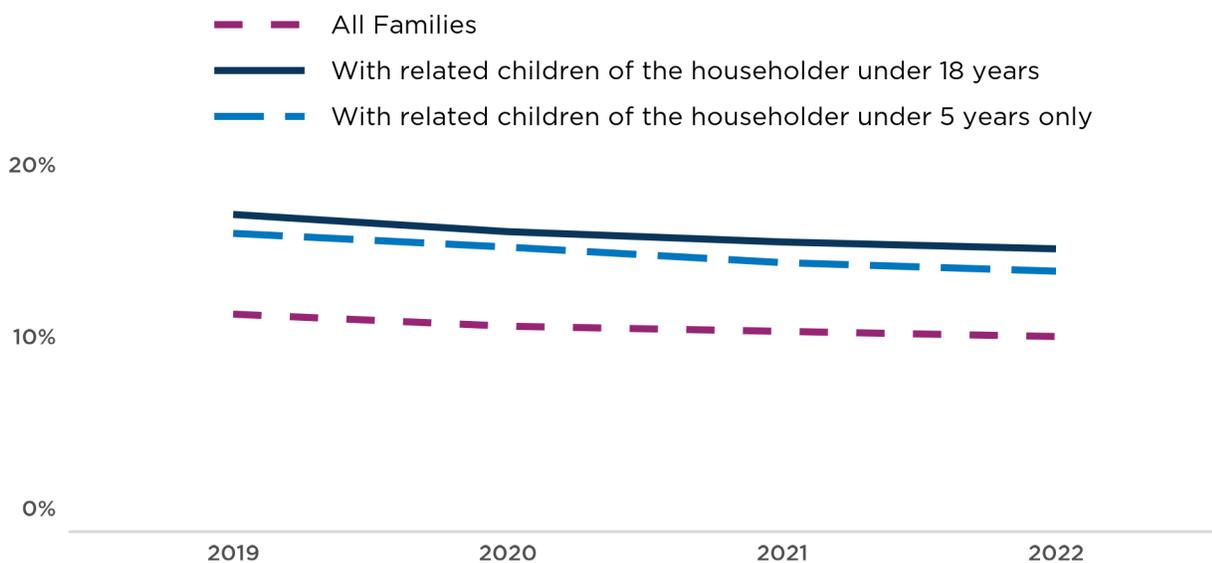

Children and Families⁷

A key goal of pandemic-era COVID-19 funds was to stabilize the child care industry. Stabilization is defined as the process of reaching a level of child care access and supply that does not fall below pre-pandemic levels. The following charts and tables show changes in families' workforce participation, income levels, work disruptions due to child care, receipt of child care subsidies, child care supply, and workforce wages from 2019 to 2022.

Percentage of children with working parents

Percentage of families living in poverty

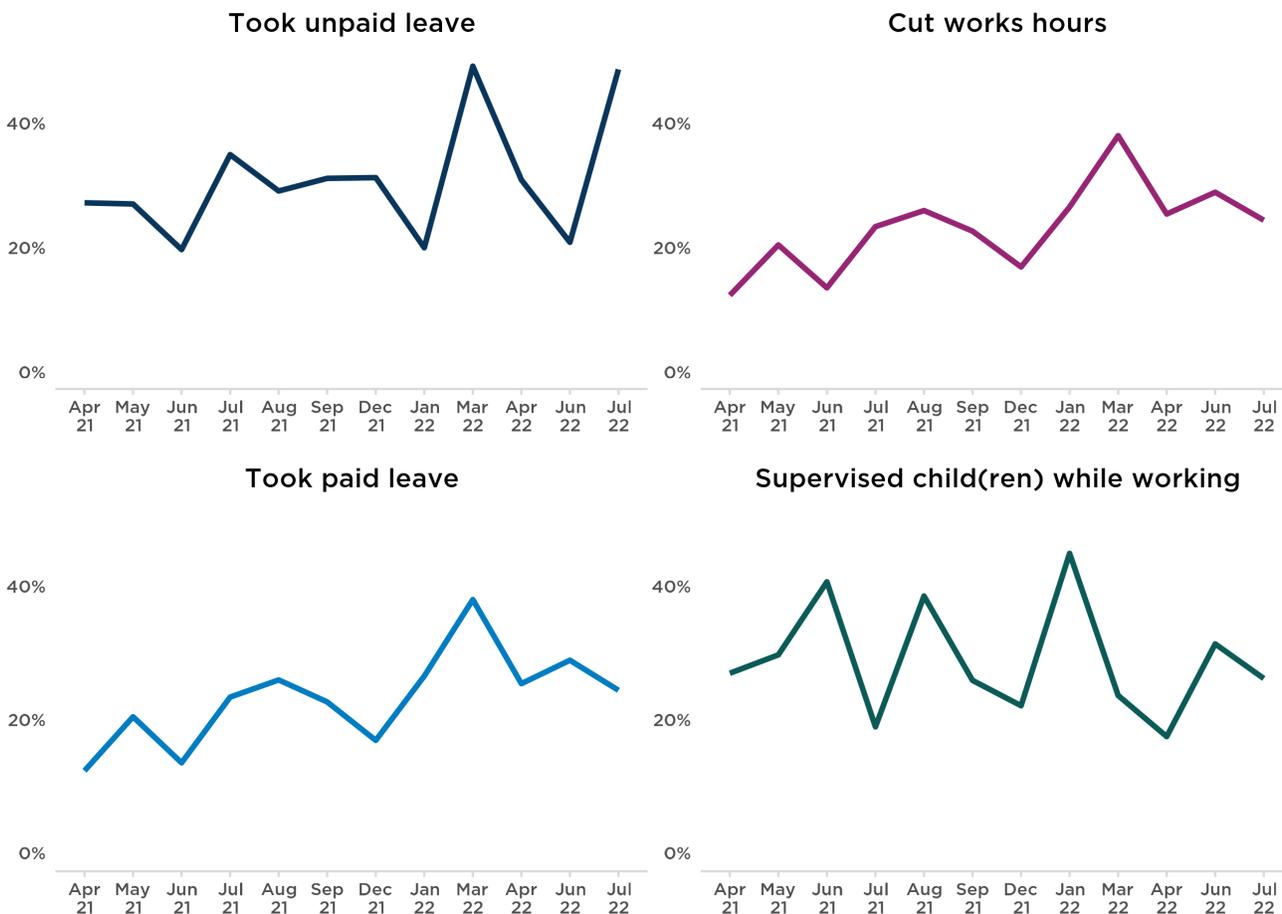

Percentage of Parents Experiencing Child Care Disruptions During COVID-19⁸

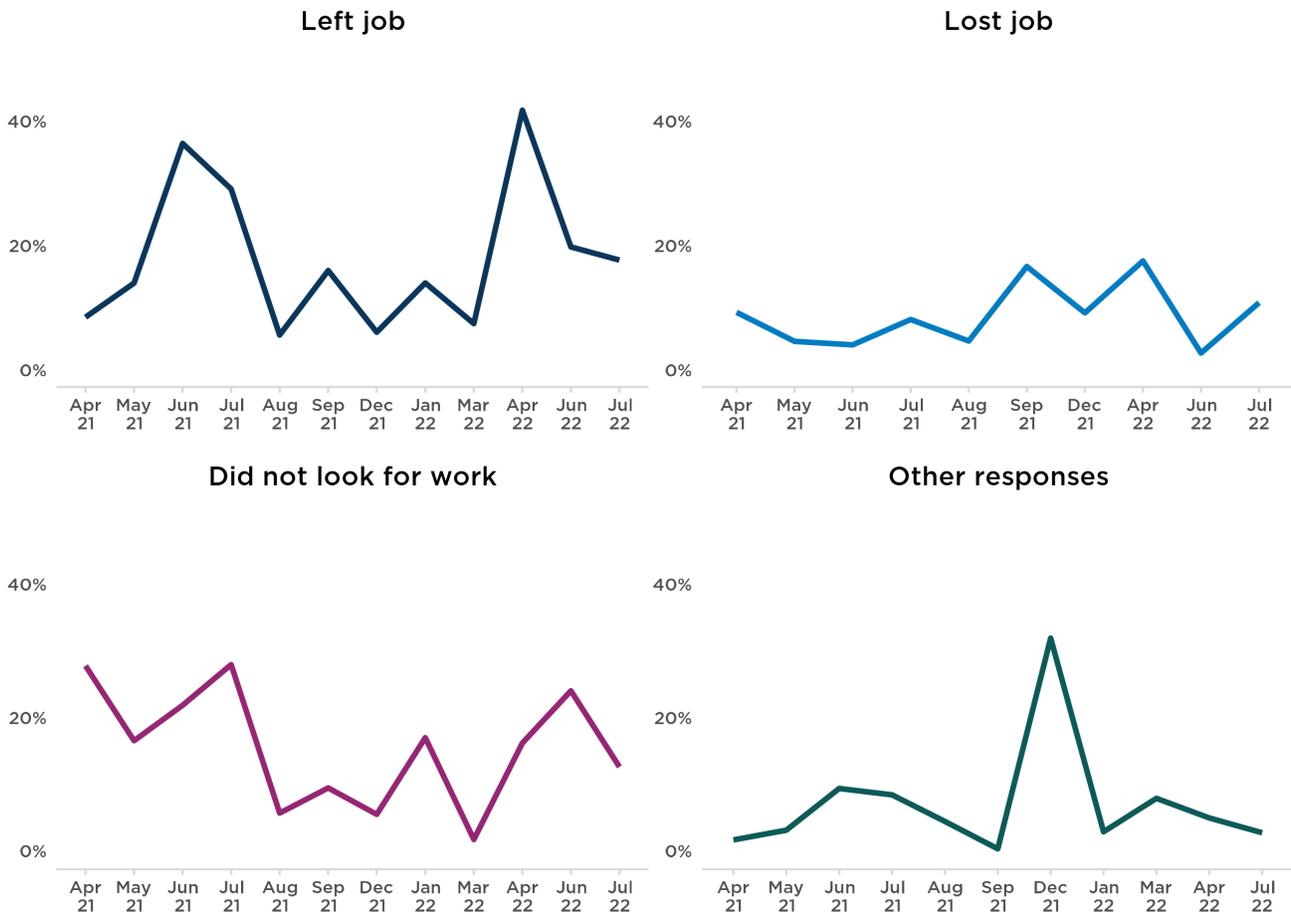

Not all months and years had data available. Only changes between available dates are shown.

Percentage of parents that experienced child care disruptions

How parents responded to child care disruptions

Children and Families Served Through CCDBG Child Care Subsidies in Georgia⁹

	FY2019 (final)	FY2020 (prelim)	FY2021 (prelim)	Difference
